

# COMPACT - CHIP-RECYCLING SYSTEMS

**CHIP-RECYCLING for** **STEEL**  
**ALUMINUM**  
**BRASS**

## You generate ...

...chips and contaminated oil or coolant during the manufacturing process. If you leave these 'wastes' as they are, these will not achieve their full value.

## Our Chip-recycling system ...

...is shredding the chips and separates them from oil or coolant. The result is clean chips which can be supplied directly into the secondary recycling-process. Therefore you can achieve a much higher price at selling. Another benefit is the reclaim and reuse of the oil or coolant. And the latest environmental rules will be observed as well.

## Your benefits in summary:

- ◆ Reclaim of oil/coolant up to 10 ltr. out of 100 kg of chips
- ◆ Shredded and clean chips
- ◆ Reduced volume
- ◆ Higher sales revenues
- ◆ Observation of environmental rules
- ◆ Shortest paybacks (ROI)
- ◆ Savings in production
